

## New Features added to Version 2

- Archive now has a customizable output location for the archived files which allows for archiving to a network location, pen drives or external hard drives.
- The software can be setup with the Windows Task Scheduler to automatically run and archive data.
- Archive Agent's Auto Email feature works with the Windows Task Scheduler to automatically email archived files to another location for off-site backups or corporate polling. The files can also be emailed to [Support@pcpoll.com](mailto:Support@pcpoll.com) for help.
- Users can now archive and restore the PLU / UPC polling data separately. The PLU / UPC is the most commonly used file.
- New Merge feature allows users to merge previously created report archives into their current polling database files to be used as a restore option if reports are accidentally deleted or as a Corporate Solution.
- Individual sites can auto email their reports to Corporate, then Corporate can merge the report data into their copy of V6 Polling for viewing, printing or consolidating.
- When restoring after a crash or switching to a new computer, Archive Agent allows users to transfer all collected data including setup files and data files, saving users time reconfiguring the software on a new PC.

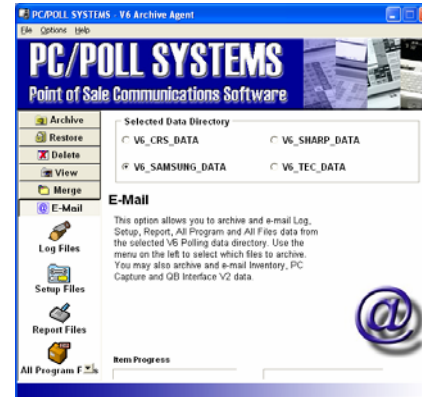

**Merge Screen:**  
The Merge option allows you to merge report data from previously created AllFiles or Report archive with your current Polling report directory.

## New Email Option Version 2

- The new email option allows users to archive and email Log, Setup, Report, All Program, All Files and PLU/UPC data from the selected V6 Polling directory.
- You may also archive and email Inventory, PC/ Capture and QB Interface V2 data.
- Archive Agent saves users on down-time. With the email option configured, users can email database files to [support@pcpoll.com](mailto:support@pcpoll.com) for help.
- Use the Auto Email feature for corporate polling.
- Use Auto Email to view files at home or while on vacation.
- Backing up data is quick and easy with the Auto Email feature.

**E-mail Screen:**  
The E-mail option allows you to archive and e-mail data from V6 Polling, V6 Inventory, PC/Capture, and the QuickBooks Interface V2.

# Version 6 Archive Agent

**A Complete Backup for All  
Version 6 Products!**

## Features of Version 6 Archive Agent

- Archive Agent interfaces with all V6 Polling registers: CRS, Sam4s, SHARP, and TEC.
- Archives PC/POLL SYSTEMS Polling, Inventory, PC/Capture and QuickBooks Interface V2 data. It is a complete backup for all Version 6 products
- Allows users to Archive, Restore, and Delete files from their polling directories.
- Polling archive and restore options are divided into sections such as archiving just the setup files or just the report files.
- Allows users to view previously created Polling archives.
- User prompts to guide the user through the software.
- Data is compressed and stored in Zip files.
- User friendly interface with easy to use Help Files.
- Software auto-checks system for installed copies of Polling, Inventory, PC/Capture, and QuickBooks Interface V2.
- Software displays messages for successful and unsuccessful actions.
- All options process quickly and are easy to execute.
- This program can be used to backup software data and to recover lost data.
- Corporate polling features include emailing options and data file merge.

Main Screen:  
This is the main menu screen. From here users can enter the different areas of the program.

## Archive Section

- Allows users to archive Log Files, Setup Files, Report Files, PLU / UPC, all their program maintenance, all their data files from Polling, Inventory, PC/Capture, and QuickBooks Interface. The software knows the location of the data to archive and restore saving you search time looking for the files.
- This section will create, compress, and name the zip file for the user.
- File names will state the type of archive along with a date-time stamp. Sample file name:  
Report 7\_28\_2003 1\_54\_00\_PM.zip

Archive Screen:  
From here, users can archive Log Files, Setup Files, Report Files, All Program Files, All Files, and PLU/UPC files from Polling. Also, All Data Files from Inventory, PC/Capture and QuickBooks Interface V2.

## Restore Section

- Users are able to restore Setup Files, Report Files, All Program maintenance, Select Program, and All Data Files. PC/Capture, Inventory, PLU / UPC, and QuickBooks Interface V2 Data Files can also be restored.
- The program takes the zip files created within the Archive section and extracts them to the current data locations.
- Users can choose specific machine or PLU/UPC files they want to restore within the Select Program and PLU/UPC restore options.

## Delete Files Section

- Allows users to Delete Log Files, All Report Files, and Selected Reports.
- Deleting Files allows V6 Polling to run faster and more efficiently by cleaning up your databases.
- Deleting Files allows for quicker viewing and consolidation of V6 Polling reports.
- Select Reports allows users to delete reports by choosing a starting and ending date range.

Delete Screen:  
From here users can Delete Log Files, All Report Files, and Selected Reports

## View Section

- Allows users to view previously created All Files archives using V6 Polling.
- Users pick an archive, and its contents are extracted to Temporary Viewing Area.
- Users can then open Polling and view their extracted data.
- Delete Viewing Data removes temporary files.

View Screen:  
This allows users to view previously created AllFiles archives.
