

FEATURES OF ARCHIVE AGENT FOR V7

- Archive Agent interfaces with all V7 Polling registers.
- Archives PC/POLL SYSTEMS Polling, Inventory, and QuickBooks Interface V3 data. It is a complete backup for all Version 7 products
- Allows users to Archive, Restore, and Delete files from their polling directories.
- Polling archive and restore options are divided into sections such as archiving just the setup files or just the report files.
- User prompts to guide the user through the software.
- Data is compressed and stored in Zip files.
- User friendly interface with easy to use Help Files.
- Software displays messages for successful and unsuccessful actions.
- All options process quickly and are easy to execute.
- This program can be used to backup software data and to recover lost data.
- Corporate polling features include emailing, ftp operations and data file merge.

Main Screen:
This is the main menu screen. From here users can enter the different areas of the program.

VERSION 7 POLLING

Check out the new features in Version 7 Polling!

The outlook bar style design makes navigating the software a snap. Users can easily jump between register Communications and Maintain with just a few mouse clicks. Version 7 Polling contains many enhanced features including:

- **Communications:** Checkbox style communication selections allow the user to quickly multi-select programs to save, to send or reports to poll.
- **Maintain:** Mass creating, editing and deleting routines simplify register maintenance. Barcode printing is included.
- **Setup:** Create Scripts, Schedules and setup the Calendar for automatic polling options.
- **Preferences:** User defined classes allow for quick sorting and searching options, along with optional software settings.
- **Reports:** The All Polls grid stores previously taken reports for later printing, viewing, and exporting. Users can also easily generate graphs based upon report data.
- **Most Recent:** Quickly revisit recently used maintenance area programs.

PC/POLL SYSTEMS

Point of Sale Communications Software

DENPRO500

Have PC/POLL SYSTEMS convert an old PLU file or Manufacturer's file into a V6 or V7 compatible format!

DENPRO500: FILE CONVERSION SERVICE

Introducing a new service from PC/POLL SYSTEMS!

DENPRO500:

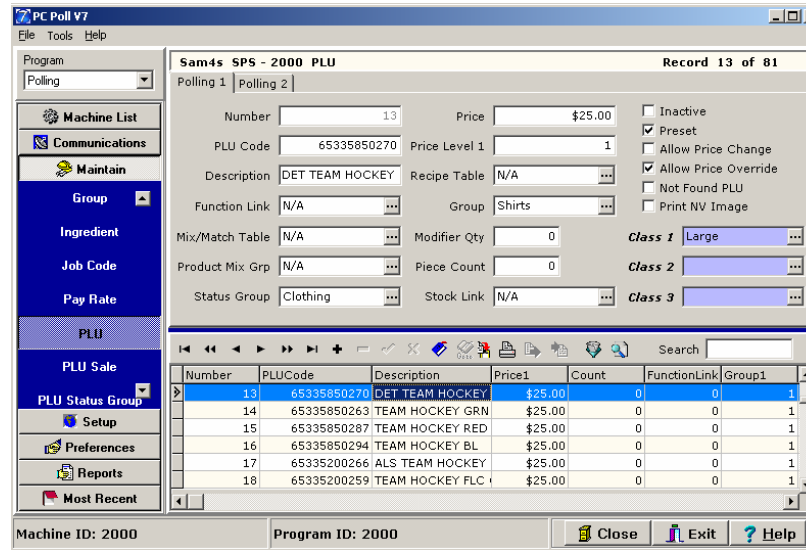

- Is a PLU / UPC generator service
- Converts PLU records using information from select formats to V6 & V7 compatible formats
- Creates a file that the user simply imports into the software and sends to the register
- Supplementary programs can also be created such as Department / Group

Save time and money by having us do the file conversion.

VERSION 7: INTERFACES

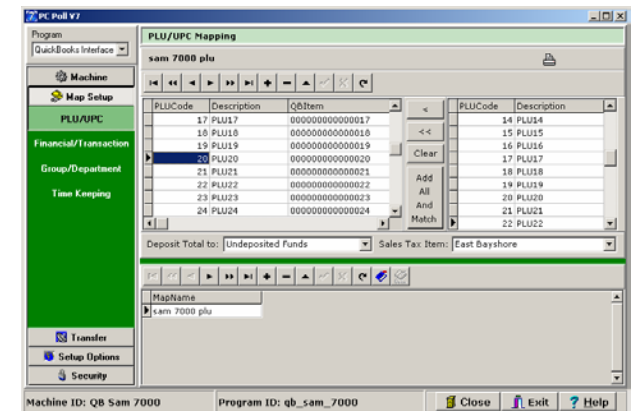

DenView500 an ingredient view of sales data.

DENVIEW500

DenView500 is a program from PC/POLL SYSTEMS that gives users an ingredient view of their sales data. Users can take previously collected V6 & V7 PLU report data and calculate the usage on assembled items. DenView500 can also be used as a security program to help catch employee theft. It can also be used for stock keeping.

QUICKBOOKS INTERFACE V3

Users can transfer V7 Polling data into QuickBooks. Custom, PLU/UPC, Transaction/Financial, Group/Department and Time Keeping data can be transferred to their QuickBooks company file. The program can be accessed through the V7 software module.

The QuickBooks Interface allows users to transfer V7 report data to QuickBooks versions 2000-2007.
