Tri-Technical Systems Promotes V9.0 AIMsi Online Tee Scheduling and PA-DSS Certified Point of Sale Software

Dubuque, Iowa - AIMsi is a complete point of sale (POS), inventory management, accounting and business software application. V9 has been PA-DSS certified and uses tokenization for credit card and auto pay processing. The software offers retailers not only a way to control inventory, manage customers and track sales, but also offers fully integrated custom add-on modules such as Repair & Service tracking, Lesson Scheduling, Short Term Rentals, Rent and Sales Contracts, Contact Management, Emailing capabilities, Tee Scheduler and a Time Scheduler. AIMsi allows users to build their own custom retail software solution by adding on the modules that are needed.

One of the newer additions to V9.0 is the integration with online Tee Scheduling. Users can log onto a course's website and book a reservation with a few simple mouse clicks. That information is then immediately sent to V9.0 AIMsi software for a seamless integration of web & live system scheduling.

V9.0 also offers two distinct POS screens, one that is touch screen which is completely customizable and offers an array of button options. The other POS screen is traditional using the keyboard and mouse. Both POS screens allow for scanning of barcodes. Retailers may also mix-and-match interface options within one installation by having a touch screen setup at select workstations and the traditional interface at others.

AIMsi can be found in a variety of retail stores across the United States and Canada. For the golf industry AIMsi can be used in-house and online for Tee Scheduling, in the pro & snack shops for retail sales, for repair & services offered, and for scheduling lessons.

To see V9.0 AIMsi software in action, please stop by booth #3416 at the PGA Merchandise Show Jan. 27-29th.
