

FEATURES OF V7 INTERFACES

ARCHIVE AGENT

- Archives PC/POLL SYSTEMS Polling, Inventory, and QuickBooks Interface V3 data for all V7 registers. It is a complete backup for all Version 7 products
- Allows users to Archive, Restore, and Delete files from their polling directories.
- Polling archive and restore options are divided into sections such as archiving just the setup files or just the report files.
- Data is compressed and stored in Zip files.
- Software displays messages for successful and unsuccessful actions.
- All options process quickly and are easy to execute.
- This program can be used to backup software data and to recover lost data.
- Corporate polling features include automatic emailing options, FTP, and data file merge.
- FTP transferring routines also included.

DENVIEW500

- DenView500 is a product that helps bridge the gap between Polling and a full-blown inventory system.
- DenView500 allows users to take previously collected Version 7 PLU reports and calculate the usage on assembled items.
- DenView500 works with all Version 7 cash registers. This program gives users an ingredient view of item sales data.
- DenView500 can be applied to many different types of stores including restaurants and bars
- This software will allow the user to create a Master Items list of all their PLU items and link up to 5 component items to each of these Master items. The component items are then attached to Raw Purchasing Units. The reports generated reflect the total usage of the Raw Purchasing Units.
- Users can also track on hand values.

QUICKBOOKS INTERFACE

- Completely revamped interface and routines
- Transfers data into QuickBooks from all supported registers in Version 7 Polling with a few simple clicks
- Interfaces with QuickBooks 2000—2007 and Standard, Pro and Premier versions
- Optional password protection for security
- Auto transfer routine for most configurations
- All files are transferred in and out of QuickBooks in IIF format
- Use any or all of the following reports from Version 7 Polling to transfer data into QuickBooks:
 - ✓ PLU
 - ✓ Time Keeping
 - ✓ Department/Group
 - ✓ Transaction/Financial
 - ✓ Check Track / Customer
 - ✓ Custom

(as available per register model)

FEATURES OF V7 INVENTORY

Introducing PC/POLL SYSTEMS' newest product: **Version 7 Inventory**. Inventory is an item tracking program for maintaining item sales and costs for multiple facilities containing one or more profit centers. With the use of multiple database tables and automated Functionality, the amount of time spent working with inventory is greatly reduced. Numerous reports provide up to date information on the status of your inventory.

Key Features

- Multiple Facilities - each facility containing one or more stores for tracking sales. On hand stock and purchase orders are maintained per facility.
- Cost tracking based on FIFO, LIFO, or weighted average.
- Fully integrated with V7 Polling - manage inventory items from within the V7 Polling maintenance area and modify PLUs while in inventory item maintenance.
- Item Transfer - transfer items between facilities.
- Adjustments - make positive and negative on hand adjustments manually.
- Inventory Item database- one inventory database for all facilities provides simple and convenient inventory management.
 - o PLU Items - items that are maintained in V7 Polling and restocked by PO or receiving items.
 - o Stock Items - bulk items that are used to supply PLU items. Ex. Keg beer in a bar.
 - o Super Items - PLU items that are restocked automatically from another PLU item such as a single can item that is stocked from a case.
 - o Support Items - non-PLU items that are used to support the business. Ex. Mops, towels, etc.
- PO Worksheet -
 - o Create a worksheet of purposed item orders across facilities and with different vendors.
 - o Compare the cost of an item supplied by different vendors. Item selection for a single facility or multiple facilities.
 - o Item selection by multiple units.
 - o Retrieve item information by scanning UPC codes.
 - o Automatically create Standing Orders for a selected vendor.
 - o Automatically create orders based on low order trigger points.

- Purchase Order - maintained per facility
 - o Automatically generate purchase orders from the PO Worksheet.
 - o Receive Full POs, Partial, and Backorder items.
 - o Include shipping costs in the cost of items.
 - o Receive items without a PO.
- Sales
 - o Auto import item sales from V7 Polling.
 - o Select V7 X or Z PLU report for sales tracking.
 - o For Casio registers, track sales form PLU and Scanning PLU reports.
 - o Enter sales manually.
- Ledger - view transactions per facility and by different time periods including current month, by day, by week, by month, and by year.
- Physical Inventory -
 - o Generate and sort lists for recording physical counts based on facility and store.
 - o Filter lists based on department and class.
- Exception List - used to track items with a negative item count.
- Reports - numerous reports for managing inventory and tracking sales:
 - o Item Reports - On hand, Item List by Department, Top Item Usage, Low Item Usage, Item Usage by Department, and Zero Sellers.
 - o Purchase Order Reports - Short Items, Near Short Items, On Order, and Received items.
 - o Ledger Reports - Sales, Transfers, Adjustments, and Super Item Transfer.
 - o End of Month - Items Sales, Current On Hand, Received Items, Item Transfer, Item Adjustment, and Physical Difference.

Item Status Screen: Maintain items within polling and inventory. Changes in one Update the other.

FEATURES OF V7 POLLING

Version 7 Polling includes an outlook bar style design that makes navigating the software a snap. Users can easily jump between register Communications and Maintain with just a few mouse clicks.

Version 7 Polling contains many enhanced features including:

- **Communications:** Checkbox style communication selections allow the user to quickly multi-select programs to save, to send or reports to poll
- **Maintain:** Mass creating, editing and deleting routines simplify register maintenance
- **Setup:** Create Scripts, Schedules and setup the Calendar for automatic polling options
- **Preferences:** User defined classes allow for quick sorting and searching options, along with optional software settings
- **Reports:** The All Polls grid stores previously taken reports for later printing, viewing, and exporting. Users can also easily generate graphs based upon report data
- **Most Recent:** Quickly revisit recently used maintenance area programs

For More Information on Version 7 Polling. Please Contact Your Cash Register Dealer.

The Machine List area of the software allows users to quickly add, delete and maintain their created machines.
